A FACT SHEET FOR PARENTS AND STUDENTS

HEADS UP: Concussion in High School Sports

The Iowa Legislature passed a new law, effective July 1, 2011, regarding students in grades 7 – 12 who participate in extracurricular interscholastic activities. Please note this important information from Iowa Code Section 280.13C, Brain Injury Policies:

(1) A child must be immediately removed from participation (practice or competition) if his/her coach or a contest official observes signs, symptoms, or behaviors consistent with a concussion or brain injury in an extracurricular interscholastic activity.

(2) A child may not participate again until a licensed health care provider trained in the evaluation and management of concussions and other brain injuries has evaluated him/her and the student has received written clearance from that person to return to participation.

(3) Key definitions:
   “Licensed health care provider” means a physician, physician assistant, chiropractor, advanced registered nurse practitioner, nurse, physical therapist, or athletic trainer licensed by a board.
   “Extracurricular interscholastic activity” means any extracurricular interscholastic activity, contest, or practice, including sports, dance, or cheerleading.

What is a concussion?
A concussion is a brain injury. Concussions are caused by a bump, blow, or jolt to the head or body. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

What parents/guardians should do if they think their child has a concussion?
1. OBEY THE NEW LAW.
   a. Keep your child out of participation until s/he is cleared to return by a licensed healthcare provider.
   b. Seek medical attention right away.
2. Teach your child that it’s not smart to play with a concussion.
3. Tell all of your child’s coaches and the student’s school nurse about ANY concussion.

What are the signs and symptoms of a concussion?
You cannot see a concussion. Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days after the injury. If your teen reports one or more symptoms of concussion listed below, or if you notice the symptoms yourself, keep your teen out of play and seek medical attention right away.

STUDENTS:
If you think you have a concussion:
• Tell your coaches & parents – Never ignore a bump or blow to the head, even if you feel fine. Also, tell your coach if you think one of your teammates might have a concussion.
• Get a medical check-up – A physician or other licensed health care provider can tell you if you have a concussion, and when it is OK to return to play.
• Give yourself time to heal – If you have a concussion, your brain needs time to heal. While your brain is healing, you are much more likely to have another concussion. It is important to rest and not return to play until you get the OK from your health care professional.

IT’S BETTER TO MISS ONE CONTEST THAN THE WHOLE SEASON.

IMPORTANT: Students participating in interscholastic athletics, cheerleading and dance; and their parents/guardians; must sign the acknowledgement below and return it to their school. Students cannot practice or compete in those activities until this form is signed and returned.

We have received the information provided on the concussion fact sheet titled, “HEADS UP: Concussion in High School Sports.”
