CORE VALUES

We believe in **keeping students our priority.**

We approach our work with an open, curious mindset, committed to learning and relentlessly focused on our students’ needs and interests. We make decisions and measure progress based on how well we are supporting our staff and improving outcomes for our students. Our passion for the success of our students motivates us to do what is needed to accomplish our goals.

We believe in **equity and belonging.**

We believe that equity and inclusion in our schools will require a healthy culture based on a foundation of dignity and belonging. We strive to build partnerships and community within these beliefs. We seek to affirm uniqueness and difference, create a culture of acceptance and growth, amplify student voice, & support the social-emotional needs of students.

We believe in **developing people.**

We know that we are only as strong as our team and that as each person develops as a learner and a leader, our district becomes stronger. We are committed to investing in the development of our people through coaching, feedback, and training, as well as by fostering an environment that encourages personal development and professional growth. We believe that by supporting the growth of our team members will we all achieve our maximum potential.

We believe in **integrity.**

We strive to do the right thing, recognizing that what is right is not always what is easy. We operate with respect and kindness and are honest, transparent and responsive in our communication and actions. We collaborate openly and hold ourselves and each other accountable.

We believe in **joy.**

We see our work as much more than a job and we are here because we love what we do. We take pride in doing great work and celebrate our collective and individual successes. We cultivate positive relationships, express gratitude, and support and uplift one another.
We believe in inclusivity. We respect and value the individual differences within our community, recognizing that the genuine embracing of those differences can increase our performance and create a culture in which everyone can (safely/openly) be themselves. We are committed to building a welcoming and encouraging environment that supports all stakeholders, gives them voice, and allows us to learn from one another.

We believe in innovative problem solving. We seek excellence and learn from our challenges and successes as we evolve beyond the traditional notion of K-12 education. We do not shy away from struggles and are resilient in our approach to problems because we know that effort and perseverance lead to success. We are courageous and intellectually curious in our search for new ways to overcome obstacles and move ourselves forward. We work together, take initiative, and innovate, all in an effort to produce positive outcomes for ourselves, our students, and our community.
VISION

Inspiring learners who feel valued, challenged and prepared to embrace tomorrow’s opportunities.

MISSION

Waukee Community Schools is a rapidly growing and increasingly diverse school district. We believe every individual’s unique background and culture enhance our schools. By focusing on the joy of learning and growth for everyone, we create a dynamic work environment for our staff while engaging our students, families and the community through innovative educational experiences.
PORTRAIT OF A GRADUATE

Waukee Community School District is committed to providing all of its students with the knowledge, experiences and opportunities necessary for them to develop the competencies required for success in school, in the workforce, and in life.
Academics
Waukee graduates will be prepared with the content knowledge and skills necessary for their future success. They must be provided a variety of rigorous curricular options that apply to their interests, skills, and aspirations.

Future Ready Skills
Waukee graduates will be prepared to navigate a complex, ever-changing global society and economy. The following skills will be demanded by employers across industries and sectors:

• Critical Thinking – The ability to reason and analyze information to come up with new solutions to a problem. It’s one skill that can’t be automated.

• Creativity – With the constant influx of new products and services, employers need creative minds that can apply these new tools to their product and industry.

• Collaboration – The ability to work with others is a timeless skill, but as processes move faster and become more complex, the ability to understand others, be sensitive to their needs and find a way to work together will be more important than ever.

• Communication – Communicating clearly in multiple modes is a much-desired skill across industries.

• Technology/Media Literacy – Being able to understand how to work with the most up-to-date tools is a crucial skill in the constantly changing landscape of work. As automated services become more prevalent, the ability to speak the language of these tools becomes a necessity for all employees.

Leadership – The ability to interact with employees, clients and other stakeholders and unite them behind a single purpose is an age-old skill that shows no signs of losing importance.

Inquiry
Waukee graduates will be prepared with the fundamental skills and knowledge of inquiry to be information literate. Information literacy is a prerequisite for success in all subjects of the curriculum, for preparation for work and further education, and for lifelong learning. The purpose of inquiry is to encourage high levels of critical thinking so that processes and resources are appropriate, conclusions are based on supporting evidence, problems are solved and decisions are made that will extend learning for a lifetime.

Wellness
Waukee graduates will be prepared with essential health and wellness skills and opportunities to continue extending these skills beyond graduation. More and more youth are coming to school with conditions that are negatively impacting their lives. No longer can health and wellness be considered an “if we have time we’ll get to it” part of a school day. As evidenced by the data, youth are increasingly entering our classrooms anxious, lacking self-confidence, and suffering from a litany of social, emotional and physical health concerns.
Connection

Waukee graduates will be prepared to successfully build positive personal and professional connections in their lives because they have experienced those connections as a Waukee student. The foundation for these connections is understanding the synergy between the heart and the mind which all Waukee students will explore through their K-12 experiences.

Plan Beyond High School

Waukee students will be prepared to be successful beyond high school. The pieces of the portrait of the graduate work harmoniously and result in a Waukee student's ability to articulate and execute a plan beyond high school that results in continuous personal growth and civic contribution.
